

***HERMETIC*** dry bags:

Protect yourself from your cell phone.

FIDLOCK®

Simple  
cleaning

**Wash your hands.  
Wash your hand held devices.**

In times where the topic of hygiene is more relevant than ever, the HERMETIC dry bags can adapt to fill another function. Hand held devices, such as smartphones, were identified as the objects where germs and bacteria can hang around for a while. If your desire is to keep your hand held devices as clean as your hands then the hermetically self sealing dry bags are a great alternative, giving you a washable case.

Easy  
handling

Keep your phone protected all day in our TPU washable case and use it regularly to talk, text, shoot photos, web search etc. Clean the case as many times as needed with soap and water or alcohol wipes.

*We started with a small amount of samples in Israel. After 10 days more than 8.000 dry bags are in use in the medical sector.*

Already  
in use in  
sensitive  
locations

FIDLOCK®

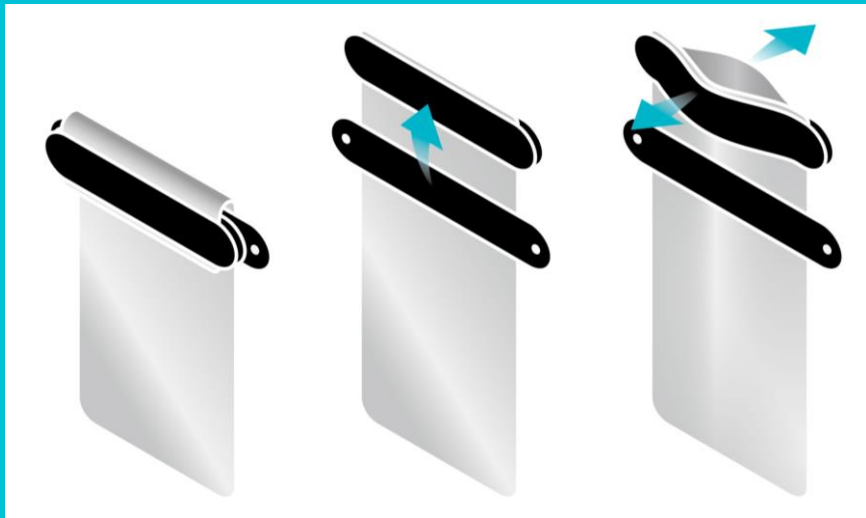

Text.  
Call.  
Surf.

FIDLOCK®

Works also  
perfect with  
classic  
phones

The three rows of magnets close automatically and seal completely hermetically. This is the patented Gooper technology. The high-quality materials are perfectly aligned.

patented,  
self-sealing  
closure technology
